

Thanks for picking up our kit!

This is a little different than the take-home crafts we have been doing.... This is an actual class! Well, a virtual class, but one you can do along with us at home!

There are no instructions with this kit because we want you to watch our prerecorded class and follow along. In the class we will explain how to do the experiments, the science behind them, and the terms for what is happening. You will perform the experiments yourself as we do in the video.

**The class will go live at our YouTube page on:
Thursday September 10th @ 11am**

(type into Google "KCKPL youtube" to find us)

The video will go live at 11am but you can watch it any time after that at your convenience.

For safety reasons do all experiments with an adult and wear any appropriate protective clothing, such as goggles.
