Girl Scout Programming at the F.L. Schlagle Library

We offer a variety of Girl Scout programs in order to help the girls along with their Journeys and badges. These programs should be used to supplement your own program as we do not cover everything that is needed to complete a Journey. The following are the programs that we currently offer to support the Journeys and more:

For Daisies:

Get Your Garden Growing

Come learn about why and how we compost, what compost can be used for, and the different ways it can be done. We will also do some work in the library garden helping to weed and plant. Learn about how to keep a garden healthy and also about the different types of gardens. This is a great fit for Daisy's working on the journey *Welcome to the Daisy Flower Garden*.

What YOU Can Do for Earth!

Girl Scouts will come to the library and learn about different ways they can help make our Earth healthy. They will learn how humans impact the Earth and how even one person can help lessen that impact. Topics addressed will include recycling, energy use, eating local, and others! Daisy's working on *Between Earth and Sky* will find some great connections to their journey.

Animal Basics

Girl Scouts will learn about our needs, and how they are similar to the needs of animals. They will also get to look at live animals and talk about the needs that need to be met in order to have happy healthy pets. Finally the girls will go on a nature hike to see animals in their natural habitat. Perfect for *5 Flowers, 4 Stories, 3 Cheers for Animals!*

For Brownies:

Water in Our World

Working on *Wonders of Water*? This workshop is a perfect fit for your journey. Brownies will learn about the Earth's different water sources and the water cycle. Girl Scouts will participate in Goopy Garbage, an activity to see how humans might be having an impact on ground water and other important water sources.

For Cadettes:

Archery

This program will fill all requirements for the *Cadette Archery badge*. Girls will learn about archery equipment and safety, after learning proper shooting techniques and how an archery range is run, they will practice through several rounds of shooting then participate in an archery challenge to sharpen their archer skills!

Programs can be scheduled by calling (913) 295-8250, option 2 or email flsinfo@kckpl.org. In order to schedule a program you must have at least 10 participants. Programs can be tailored to meet your needs.

All programs are free of charge unless we need to purchase supplies, in which case we charge a small cost recovery fee. If there is a cost recovery, you will be notified during the scheduling process.
